

Malaysia Air Quality & Emission

connecting greenhouse emissions to local pollutant

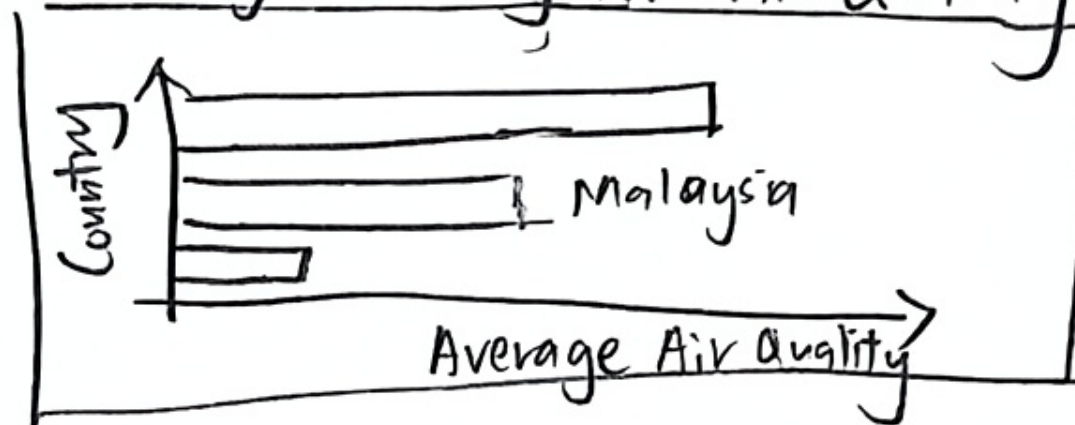

(1) Global and Regional Scale

World Map

. is the most polluted country.

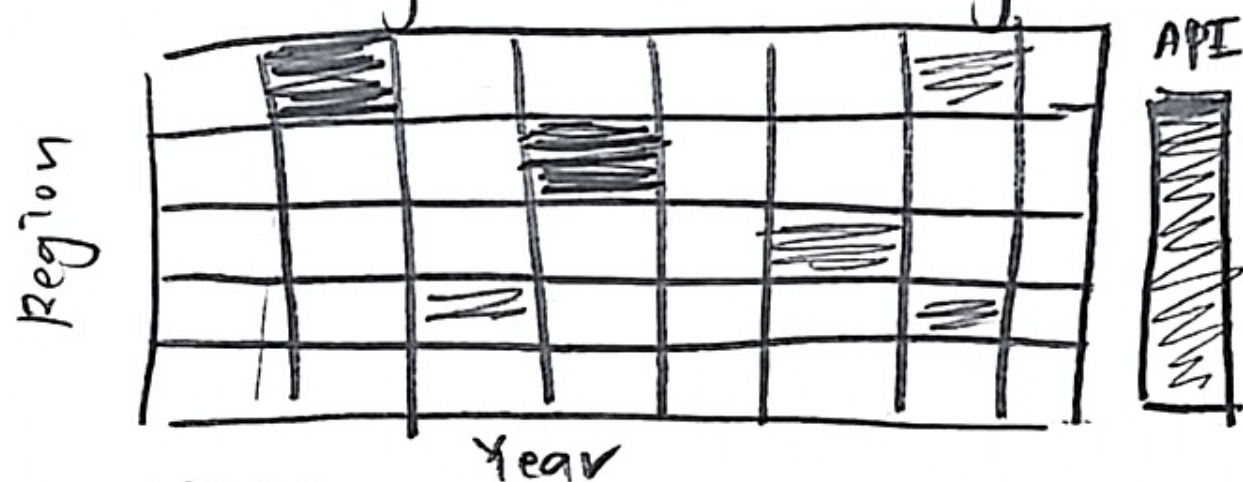

Ranking of country for Air Quality

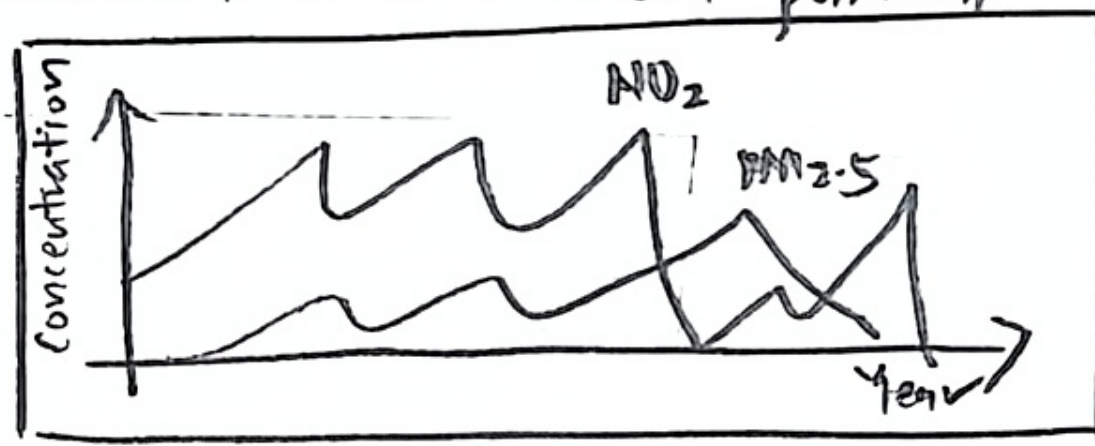

Malaysia air quality

(2) Tracking the Severe Haze Crisis

Air Quality across different region

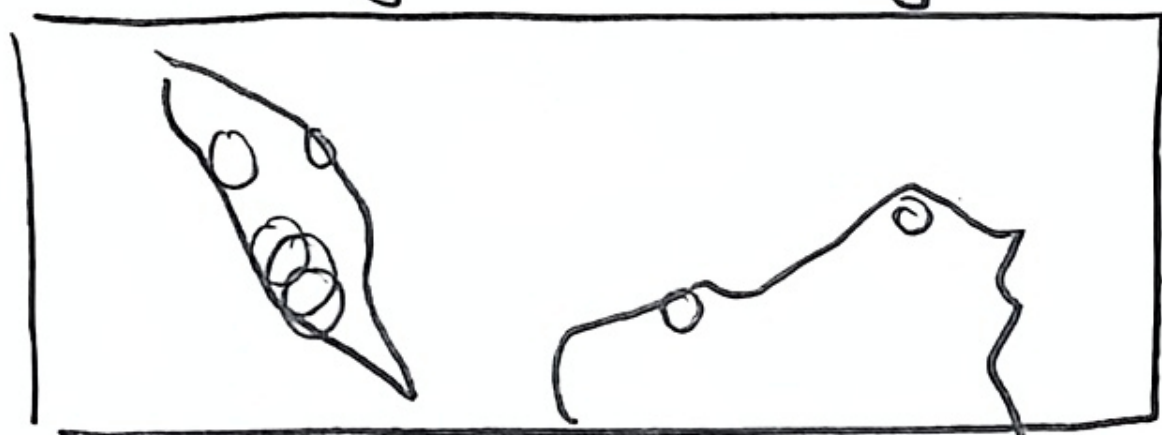

Concentration of different pollutant

. PM2.5 is the biggest concern.

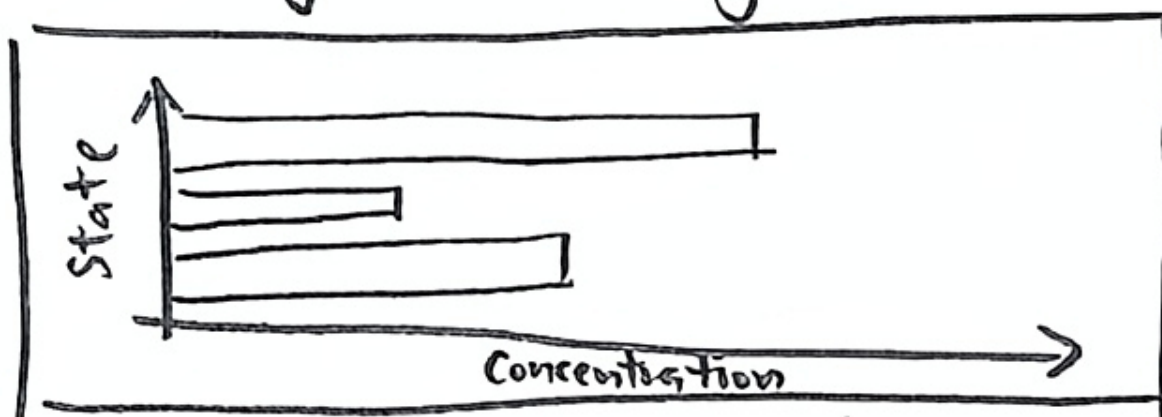

(3) Geographic Distribution and Urban Divergence

Air Quality Across Malaysia

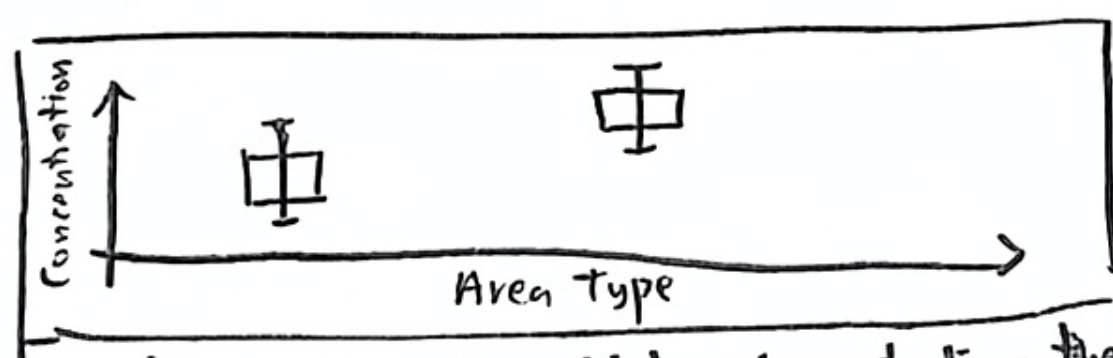

West Coast has higher PM2.5 concentration.

- Malaysia states By PM2.5

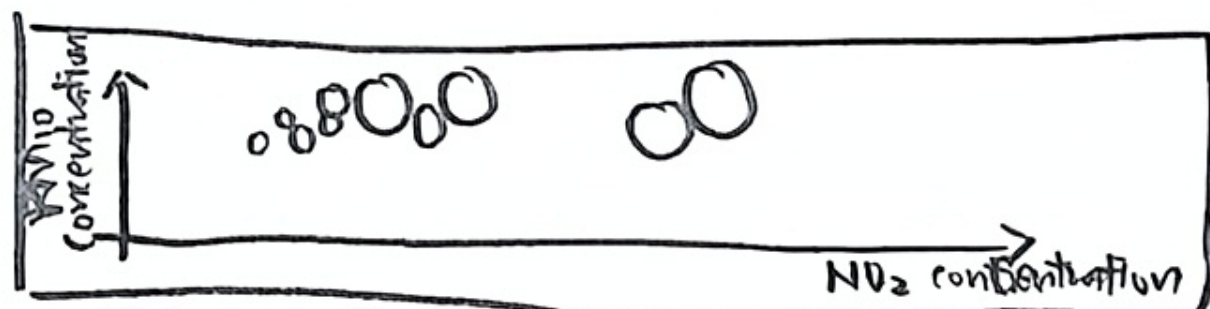

Selangor is the most polluted state. . . .

PM2.5 Pollution : Urban VS Rural

Urban area has higher concentration than rural.

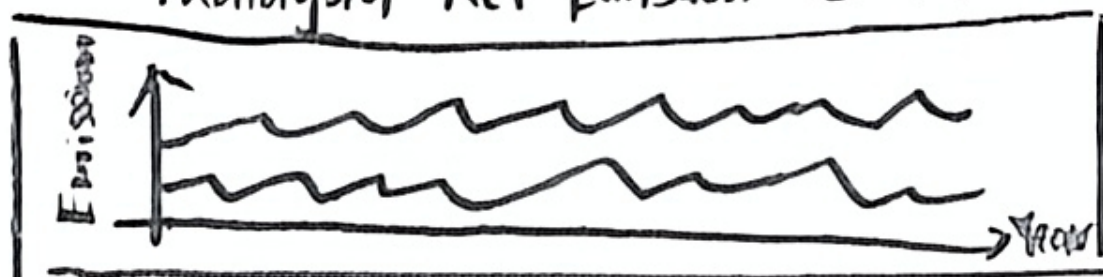

Strong Pollutant in Urban Area

Urban area displays a direct correlation between NO2 and PM particle.

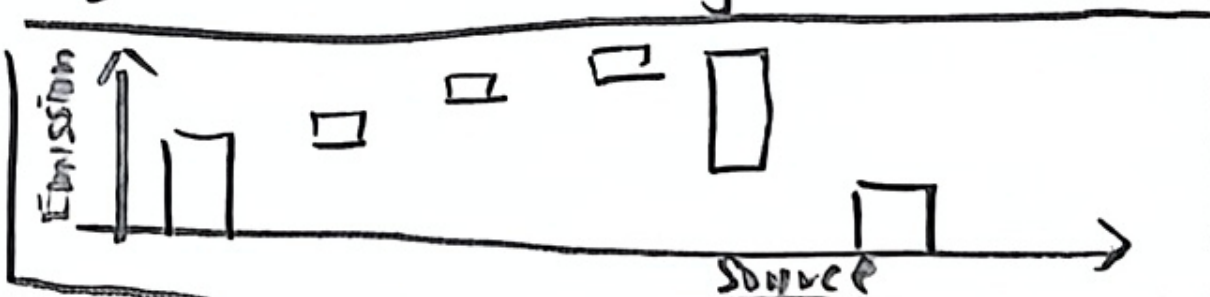

(4) Dissecting the Greenhouse Gas Emissions Profile

Malaysia Net Emission Vs Total

.

LULUCF Reduces Malaysia's Net Emissions

LULUCF reduces out Malaysia greenhouse emissions.
